
The metrica family is growing – second location in the USA

It is with great pleasure that we announce the acquisition of the carpentry company VCA Inc. from Northampton (Massachusetts). The company has been working for metrica Inc. for a long time and specializes in high-quality residential interior design and bespoke furniture.

With metrica Massachusetts, metrica is now represented in the USA with a production site.

This strategic acquisition is an important milestone on metrica's consistent path to diversification and a positive development. This strategic step enables us to support projects in the residential business segment on the US market with our own production capacities and thus further expand metrica's market share as a group.

We expect a further strengthening of sales activities in the USA and thus further growth in our residential business and we are very pleased to be able to expand a good and efficient business in Northampton.
