When Johann Dietrich Rincklake founded a carpenter's workshop dedicated to the artful production of premium pieces in Münster, Westphalia, 337 years ago, a legacy of the highest standards in craftsmanship was born. *Metrica* emerged from this legacy.

*Metrica* plans, designs and transforms homes and yachts into inspired spaces that are meant to be celebrated and lived in for years to come. They work hand-in-hand with clients during the entire process of construction to ensure that the client's vision is brought to reality, that the budget is maintained, and that schedules are adhered to. Each luxury residence or superyacht is a perfect union of innovation, craft, comfort and quality, all at the highest level. *Metrica's* team spirit, attention to detail, and clarity help to achieve the very best for their clients, who experience this spirit through the dedication of the craftsmen and the level of reliability throughout the process.
